

I once dreaded being home in the evening after work because I was bothered by phone calls from telemarketers until bedtime (and sometimes, after falling asleep!). I often wanted to rip the phone cord out of the wall so that I could have a life uninterrupted by often nasty and demanding and demeaning telemarketers. Since joining the NJ Do Not Call list, I am free to conduct my life - and those I care about can actually call me without getting a busy signal most of the time. I am a private citizen and I pay the phone company for the use of a telephone line; I DO NOT pay them so people who want to make money off of me can tie up my line!!! I wholeheartedly support the NJ Do Not Call legislation; please do not mess with success!!!!
